Michael Wehner gave a presentation on Vincenzo Piccolomini medal which he purchased due to the potential link to California. The bronze medal is dated 1836 with the date 1843 in roman numerals on the bust of Count Vincenzo Piccolomini. Piccolomini was a member of several scientific and academic societies who traveled the world engaged in scientific pursuits. The medal appears to commemorate Piccolomini success as a cartographer of California - what is now the western side of Mexico. There is a beetle named after him in Mexico which supports the theory that Piccolomini traveled there. The while researching Piccolomini and the medal, Michael has several unanswered questions including who made the medal, are there any Piccolomini maps in existence and was Piccolomini truly a Count or an impostor? Thank you, Michael, for stepping in at the last minute to present.

Membership agreed to endorse Don Kagin for President of the ANA with a renewal of his PCNS membership.

The drawing was postponed until the next meeting at Fort Mason.
